I. Claims 1-4, drawn to a device, classified in class 216, subclass 12+.

II. Claims 5-11, drawn to a method, classified in class 438, subclass 166.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made materially different process such as not having a second set of slits verses the claimed invention.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
